【Work of North life②】

Example of OEM・ODM product

Put 1g of the vegetable wash powder (shake the bottle five times) into 1 litre of water and stir it well.

Soak vegetable and fruit into the water about 5 to 10 minutes, then wash them. The color change of the solution and the oil removed from the foods can be seen.

Sterilizing effect and wax & pesticide removing effect of natural alkaline solution removes oil from vegetables and fruits. In addition, it sterilizes germs which cause food poisoning and virus, so it is suitable for fresh and uncooked foods.

Calcined Scallop Shell Calcium : 100%

Example of OEM・ODM product

Rare Ingredient

Number of deer captured is increasing year by year, however skins of deer are mostly used for leather products (bag, purse, etc.). The skins for extracting collagen is very rare and limited.

Special Technology

There is only one factory which obtains the technology, and knows how to extract collagen from deer skin.

Hokkaido Sika Deer Collagen is second to none product in the world that other companies couldn't produce.

* Approx. JPY 30,000,000 (Approx. USD 250,000) advance payment is required.
